

Mini-Marquees®

Hard Standing Kit

Step 1

Step 2

Step 3

Step 3

Step 4

To be used whenever it is not possible to anchor the Mini-Marquee™ into the ground through the holes in the feet.

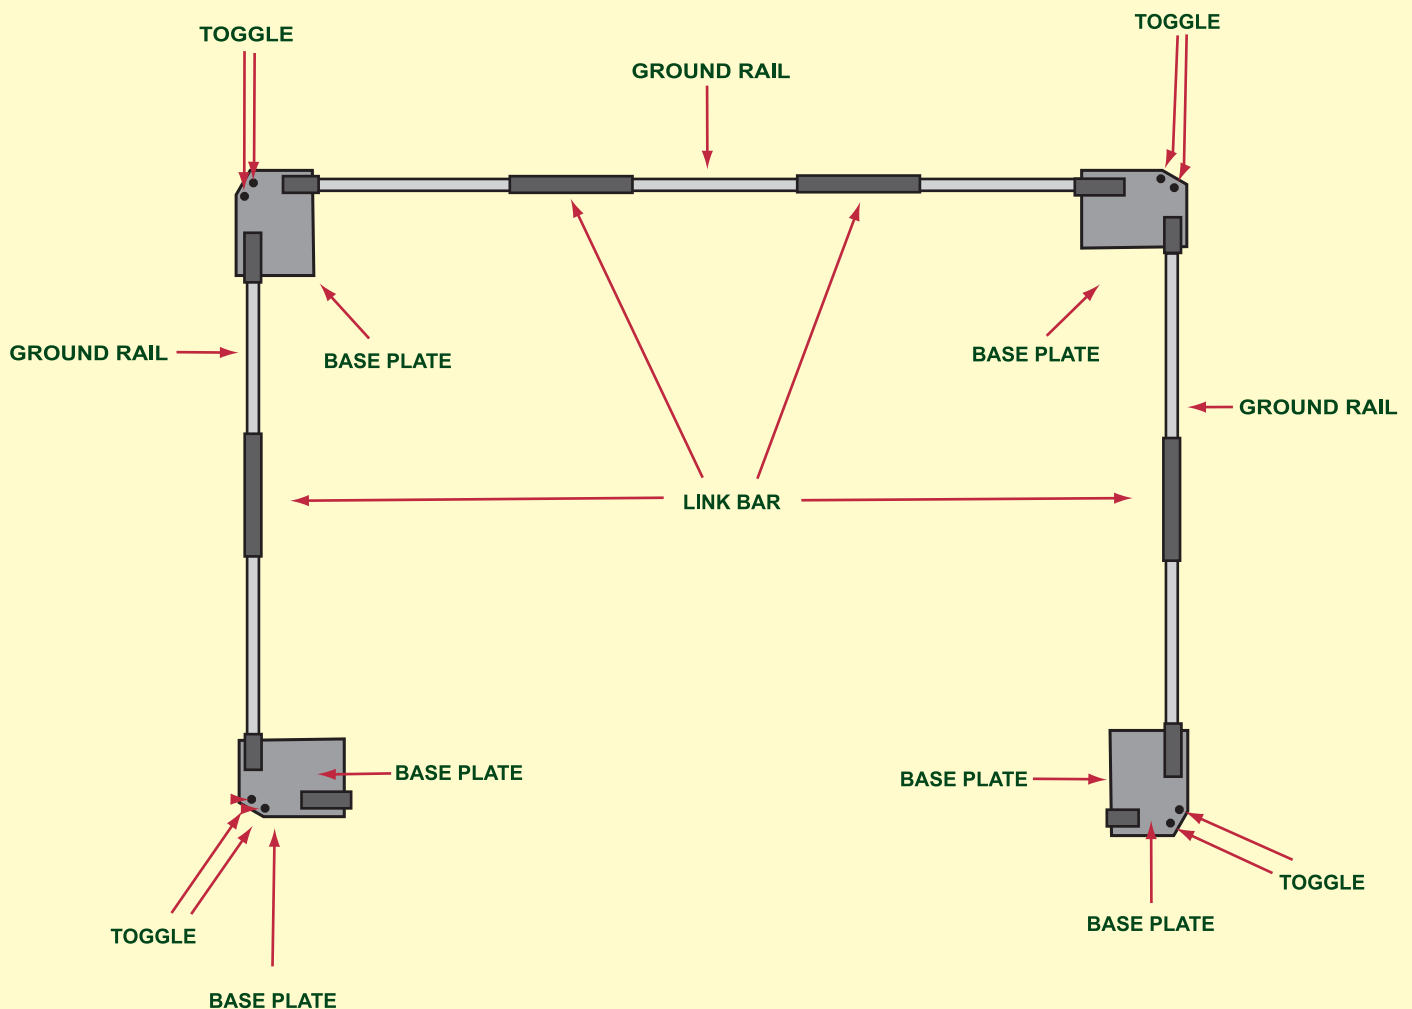

It also provides a means of linking together the legs of the Mini-Marquee™ on three sides.

1. Lift the toggles on the two quick release studs on each baseplate.
2. Place the Mini-Marquee™ foot over the studs and close the toggles.
3. Connect the ground rails and link bars together and then clip into each baseplate.
4. **IMPORTANT:** Sandbags holders are included with a Hard Standing Kit. Sandbags available at your local DIY store. Base plates must be weighted, either with sandbags, or with Baseweights (pictured) which can be ordered as an accessory.
